

## Connection to a Network license

**Caution:**

1/ **Connecting to a network license requires that it has already been activated by following the procedure [Activating a network license](#)**

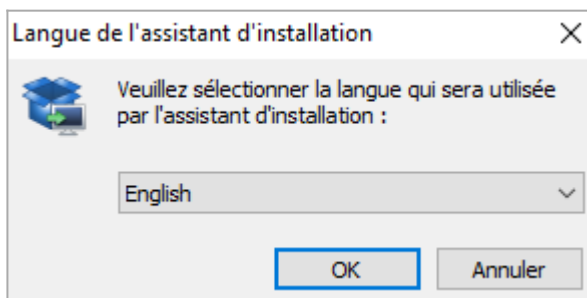

2/ To install Phase Manager it is **highly recommended to have administrator rights**

3/ To use the license it is necessary to **MODIFY rights on the UNC license directory**

### 1/ Installation of Phase Manager

Download Phase Manager (click here for last release). **Right click** on the executable than run it with **Administrator rights**

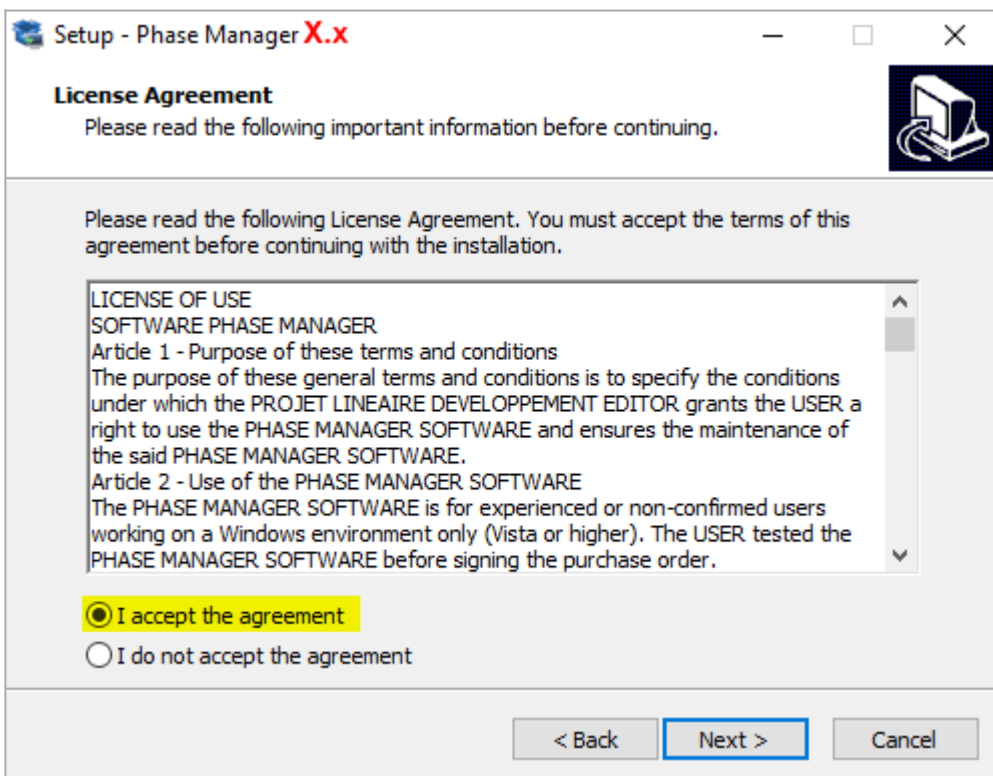

Once launched, choose the installation language:

Skip the welcome screen by clicking on **Next** :

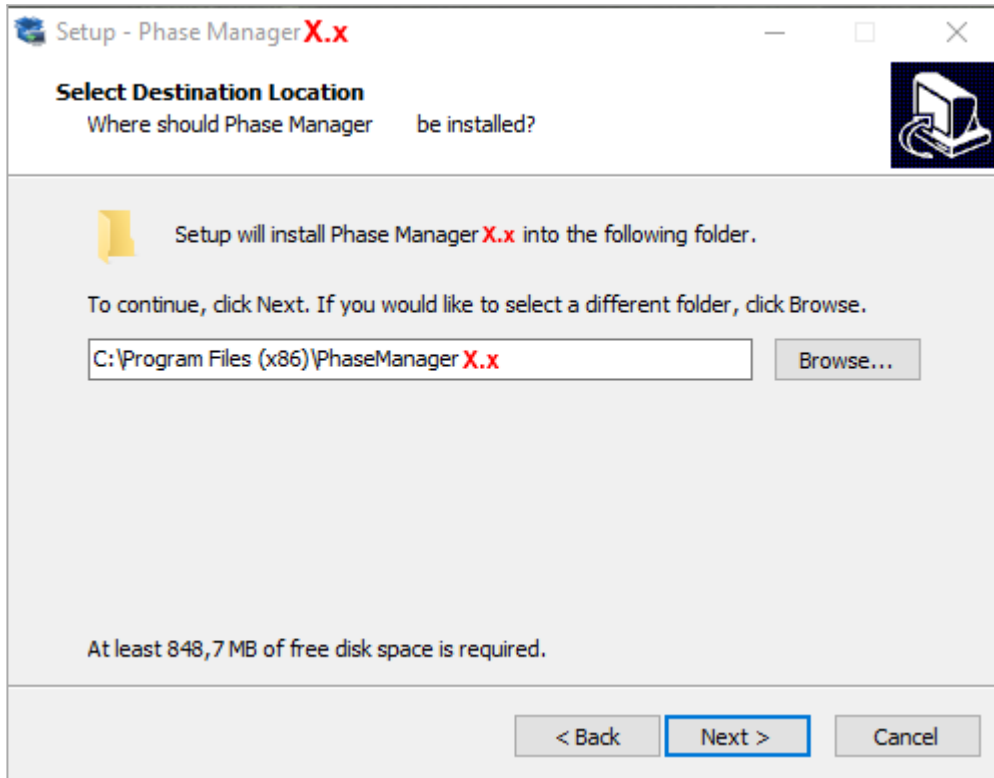

Read then accept the license agreement to continue the installation by clicking on **Next** :

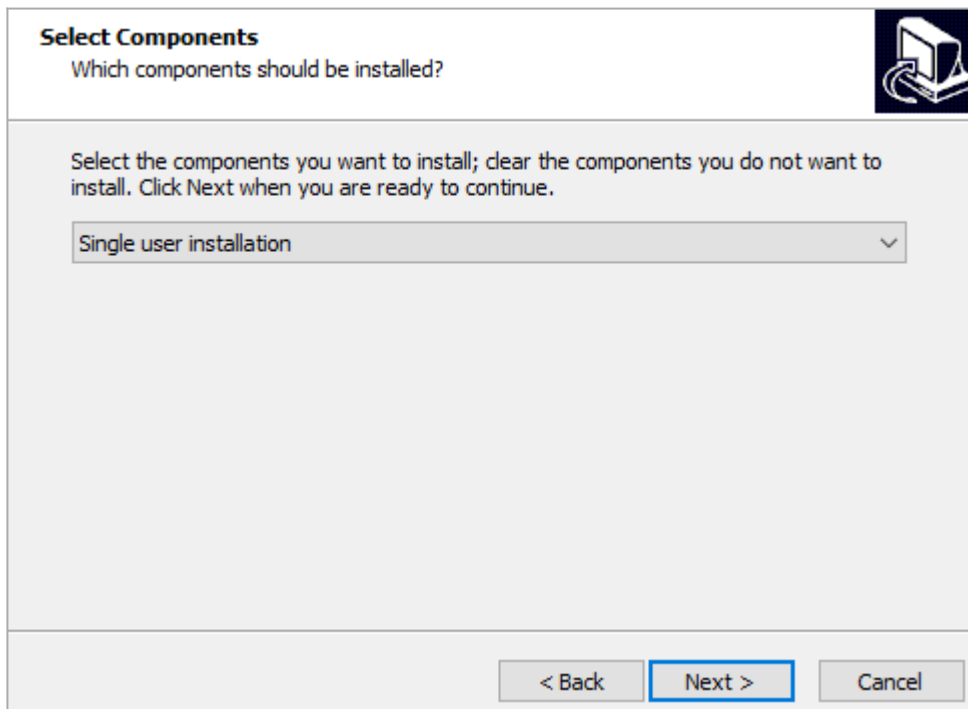

**By default** the setup will ask you to install Phase Manager in : **C:\Program Files (x86)\PhaseManager X**  
**If you didn't launch it with admin right** , it will propose you to install Phase Manager in :

C:\Users\Public\Documents\PhaseManager7

Choose '**Single user installation**'

Validate the Start Menu Folder screen by clicking on **Next** :

**Select Start Menu Folder**  
Where should Setup place the program's shortcuts?

 Setup will create the program's shortcuts in the following Start Menu folder.  
To continue, click Next. If you would like to select a different folder, click Browse.

Projet Lineaire

Choose and validate the icons creation screen by clicking **Next** :

Select the additional tasks you would like Setup to perform while installing Phase Manager **X.x**, then click Next.

Additional icons:

Create a desktop icon

Create a Quick Launch icon

On the following screen click on **Install** then once installation is complete, click on **Finish**

---

## 2/ Connection to the network license

Once Phase Manager is installed, double-click on its icon to launch it.

At first launch, the license configurator will display:

To connect to your network license, you will need to fill in the following fields:
